

Upcoming Construction Projects

Starting in Spring 2010, there will be three projects in construction that will affect the roads around campus. This will mean that Chevrolet Avenue will be closed from University Avenue to Glenwood from approximately April to September. Minimal access will be provided to allow access to the Campus Village parking lots. NO PARKING will be accessible in front of the Campus Center. In addition, the drive off of Chevrolet Avenue, between the Campus Center and the Mott Center will be blocked with a curb and sidewalk.

The three projects are:

Chevrolet Avenue Reconstruction from the Flint River bridge to University Avenue - City Funded

Kettering Extension of the Flint River Trail - American Recovery and Reinvestment Act OF 2009 (ARRA) funded

Kettering Gateway (direct campus access from I-69) - American Recovery and Reinvestment Act OF 2009 (ARRA) funded

Additional information concerning any of these projects can be provided by the Physical Plant office.
